“ quickDash gives us a comprehensive view of our business and enables us to better serve our customers and run our operations more efficiently. Our diverse business generates volumes of data and the tool provides our associates with analytically-based & actionable insight to make more effective decisions that positively impact our bottom line.”

CTO - Logistics & Warehouse Company

Why quickDash

- Easy Integration :** quickDash can be easily plugged into existing web applications by just dropping a small piece of code, It can also be solely deployed as a web application and integrated with other web applications, Its highly configurable XML file makes it easy for non-developers to configure and add/remove KPIs over the period.
- Rapid Implementation :** quickDash’s underlying architecture provides the framework support to point quickDash to various data sources and get it up and running within a few weeks.
- Web Based :** quickDash can be accessed from any device which is browser enabled.
